**Samples have been tested by Quantitative Polymerase Chain Reaction (qPCR).  
Results reported are to the limits of the qPCR assay performed.**

The quantitative real-time PCR diagnostic assay detects the presence of *Leifsonia xyli* subsp. *xyli*, the causal agent of Ratoon Stunting Disease. Sugar Research Australia Limited (SRA) is not responsible for results that are below the detection limit of the assay. The results provided by SRA are strictly limited to the samples provided by the client. Clients should not represent or imply that the results apply other than to the actual samples provided for assay. The client releases and indemnifies SRA in respect of any loss or liability incurred as a consequence of any such representations, which remain at all times the sole responsibility of the client. SRA assumes no liability.
