

HOW TO USE THE SUGARCANE FARM BUSINESS SURVEY DASHBOARD

Example dashboard result: 67% of farms from the medium to high profitability quartile used cane from an approved clean seed plot for the last 5 years.

- Select a main topic: (slide number at the bottom of the screen)
 - Sugarcane farm financial performance (It is possible to display 2013–14 or 2020–21 results on the Sugarcane production costs, average \$/ha graph)
 - Sugarcane farm management constraints and focus areas
 - Sugarcane farm management practices
 - Sugarcane farm pest and disease management
 - Sugarcane farm chemical use
- Apply a filter
 - Region
 - Farm size
 - Profitability quartile

The visualisation will display data relevant to the selections made.

- It is possible to download an Excel file of the results.
- For more information about results including regions, measures and sample size refer to the 'Definitions and more information' tab.
