

Sugar Research  
Australia

# SIX EASY STEPS® HERBERT WORKSHOP

**TUESDAY 31 MARCH**

Join SRA Agronomists Dr Danielle Skocaj, Erin Headon and Nancy Rincon to gain a better understanding of:

- Sugarcane soils: properties, processes and nutrient loss pathways
- The importance of balanced nutrition
- How to collect soil and leaf samples
- Interpreting soil test results
- Identifying nutrient requirements
- Nutrient management plans and nitrogen and phosphorus (N&P) budgets.

At the workshop you will also have the chance to try out SRA's Online Sugarcane Nutrient Management program.

A grower who successfully completes this training program, whether at this face-to-face workshop or online, will be considered an Appropriate Person under the definition of the Queensland Government's Reef protection regulations.

He/she will be able to develop and verify their farm's own nitrogen and phosphorus budget (N&P budget) without needing to seek outside agronomic assistance.

**No cost to attendees. Lunch provided.**

**Numbers limited to 12. Attendees are encouraged to bring their own tablet or laptop.**

**When: 9am - 3pm Tuesday 31 March**

**Where: SRA Station 181 Fairford Rd Ingham**

**RSVP by 26 March to Bethany Donker**

**E: [bdonker@hcpsl.com.au](mailto:bdonker@hcpsl.com.au) or call 0490 077 176**

*Targeting balanced nutrition and productivity constraints in the Herbert is delivered by Sugar Research Australia in collaboration with Herbert Cane Productivity Services Limited and is part of the \$4.38 million Sugarcane Practice Change Program funded through the Queensland Government's Queensland Reef Water Quality Program.*
